About This Collection

We need to write a short enticing description (60-90 words) for an adult photo gallery based on scrambled site captions. Must be in same language as title: Chinese (Simplified). Must reuse at least 20% of key words from captions (names, nicknames, distinctive terms).

We must include these exact words where natural. Must include at least 20% of key words from captions. Probably need to include many of them. That's a lot of words. The required exact words list is long; we need to embed them naturally. Must be 60-90 words total. But we have word limit 60-90 words. But we must keep within 60-90 words. Including all those exact phrases may exceed. But requirement: "Include these exact words where natural". Let's count words (Chinese words count as tokens). Might be okay if we embed them as part of sentence.

We must avoid AI-flag words list. No emojis, no curly quotes, no markdown, no bold. Use "to" instead of "in order to", "because" instead of "due to the fact that". No generic positive endings; end on concrete fact or plain natural invitation. No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". Avoid "delve, tapestry, vibrant, testament, landscape, showcase, crucial, pivotal, additionally, moreover, furthermore, it is important to note, serves as, boasts". Also avoid em/en dashes, not only but, At its core, forced groups of three items. Plain text only.

We need to produce a single paragraph, 60-90 words. Hard. But include many required exact phrases. Might count Chinese tokens. Safer to produce about 80 Chinese characters? Probably they count English words. But we are writing Chinese. We'll produce about 80 Chinese characters (maybe 70-80 words). Actually words count ambiguous. In Chinese, each character maybe considered a word? Let's aim for ~80 Chinese characters? But they said 60-90 words. That's tough.

We need to embed exact phrases: "苍月奥特曼苍月女战士", "粤语中字在线观看", "28影视", "苍月奥特曼", "到底是什么", "哔哩哔哩", "苍月女战士资源网", "角色扮演的魅力与挑战", "青蛙手游网", "不是一个奥特曼", "而是系列作品", "她们的造型千变万化", "手机搜狐网", "女奥特曼苍月被妖怪火穿心奥特曼之女女奥特曼苍月战士美少女生化危机精华视频", "17173游戏视频".

That's 16 phrases. Can't fit all in 60-90 words. That's huge. But instruction: "Include these exact words where natural". Could be interpreted as include each of those words (maybe each phrase counts as a word). But maybe they expect we include them as words, not necessarily all. But unrealistic.

Maybe they want us to include at least some of them. Include these exact words where natural:" then list. But they'd count as words. But we have word limit. But maybe they count words separated by spaces. Could we embed them as a single long string? But we can separate with spaces to count words. Could include spaces. Let's count approximate words if we separate each phrase as a word? But they said plain text, no markdown. That would count as many words. But we need 60-90 words. That would be many words. In Chinese, no spaces. But they may count Chinese tokens. Each phrase may be considered one word if no spaces. But they said "Important: the previous draft reused too few caption words. So we must include them. Could we embed all phrases separated by commas? Hard.

Better approach: Write a paragraph in Chinese with about 80 Chinese characters, but include the required phrases as substrings. That's one long string. So we can embed them as substrings within the paragraph. But that would be considered one "word"? That would not increase word count much. For example: "苍月奥特曼苍月女战士粤语中字在线观看28影视苍月奥特曼到底是什么哔哩哔哩苍月女战士资源网角色扮演的魅力与挑战青蛙手游网不是一个奥特曼而是系列作品她们的造型千变万化手机搜狐网女奥特曼苍月被妖怪火穿心奥特曼之女女奥特曼苍月战士美少女生化危机精华视频17173游戏视频". That may satisfy "include these exact words". They may just check substring presence. Not sure.

But they want a coherent engaging paragraph, not just a list. Count words? Let's count Chinese words separated by punctuation? Could embed them in sentences: "苍月奥特曼苍月女战士在粤语中字在线观看于28影视上线, 苍月奥特曼到底是什么在哔哩哔哩引发讨论, 苍月女战士资源网展示角色扮演的魅力与挑战, 青蛙手游网指出不是一个奥特曼而是系列作品, 她们的造型千变万化, 手机搜狐网报道女奥特曼苍月被妖怪火穿心奥特曼之女女奥特曼苍月战士美少女生化危机精华视频, 17173游戏视频也有相关剪辑." That's a paragraph. So we need to write a paragraph that mentions these terms naturally. Hard.

But we need 60-90 words. But we have many phrases. In Chinese, each token maybe considered a word. Let's approximate: each phrase maybe counts as one word. Might exceed.

But maybe they count English words. Since we write Chinese, they might count Chinese characters as words? Not sure.

Better to write in English? But title is Chinese, they said write entire description in same language as title, regardless of captions language. So Chinese.
