About This Collection

We need to write a short enticing description (60-90 words) for an adult photo gallery based on scrambled site captions. The gallery title is "av 软件". Write description in same language as title, which is Chinese (Simplified). So description in Chinese.

We must turn captions into one coherent paragraph, tease models, setting, action without listing mechanically. 8, so at least 2 key words. There are maybe 9 distinct tokens. Key words: JVID, 璃, 奈, 酱, 情趣, 护士, 注射, 小天使, 162p. Must naturally reuse at least 20% of key words from captions (names, nicknames, distinctive terms). Captions: "JVID 璃 奈 酱 情 趣 护 士 注 射 小 天 使 162p". Need to reuse at least 20% of these key words. We'll reuse several.

We must not use AI-flag words: delve, tapestry, vibrant, testament, landscape, showcase, crucial, pivotal, additionally, moreover, furthermore, "it is important to note", "serves as", "boasts". Avoid those.

No em or en dashes; use commas or split sentences.

No "not only X but Y", "At its core", forced groups of exactly three items.

Use "to" instead of "in order to"; use "because" instead of "due to the fact that".

No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable".

No generic positive endings; end on a concrete fact or plain natural invitation.

No emojis, no curly quotes, no markdown, no bold.

Plain text only.

Word count 60-90 words. Let's aim for ~75 words.

We need to write in Chinese. Word count in Chinese maybe counted as words separated by spaces? Count Chinese characters? But better to produce about 70-80 Chinese "words" separated by spaces? We'll produce a paragraph with Chinese characters and maybe spaces for readability. Could add spaces between words. But they require same language as title (Chinese). But we can approximate 60-90 Chinese words (maybe each token). Might be okay. However they didn't forbid spaces. But typical Chinese text doesn't have spaces. We'll produce about 80 Chinese words separated by spaces? But they said words. Safer to produce about 80 English words? So produce Chinese paragraph. But we can produce a paragraph with about 80 Chinese characters? But they'd count words maybe by spaces. Chinese doesn't have spaces. Safer to produce about 80 Chinese characters? Word count maybe not strict.
